Professional Summary

Motivated Software Engineer and Systems Support professional with more than two years of experience in system support, network administration, and database management. Skilled in PostgreSQL, MySQL, and Oracle Cloud services, with strong knowledge of system integration, API development, security, and performance optimization. Currently developing a React based full stack school management system addressing real operational challenges for private schools in Lesotho. Passionate about building reliable, production ready solutions and continuously improving technical expertise. Always eager to learn, I thrive in collaborative environments and enjoy tackling complex problems with innovative approaches.

Key Competencies

● Technical Skills :

- **Front end:** React, Vue.js, Typescript, Tailwind CSS, HTML, CSS
 - JavaScript
- **Back end:** Python (Django), Node.js
 - SQL (PostgreSQL, Oracle), MySQL
- Java, C++, C programming, C#, .NET Assembly Language
- Linux Systems(Ubuntu & Kali)
- Git, Docker (Containerization)
- REST APIs, GraphQL
- Maintaining IT risk registers, IT policies, procedures, and controls.
 - Asset tagging, tracking, and secure storage

● Areas Of Expertise :

- Risk assessment and support for internal IT audits
- Secure disposal of IT equipment
- Compliance with data protection, CIA triad standards
- Data Security & Access Control (RBAC, Encryption)
- System Support & Troubleshooting
- Network Administration (LAN/ Unify ISP, Client-Server Systems)
- Data Integrity, Maintenance & Patching
- ERP / Integrated Systems Support
- Documentation & Technical Reporting

Education

- **National University of Lesotho**
Bachelor of Science in Computer Science
- **Leribe English Medium School**
LGCSE
- **Leribe English Medium School**
Junior Certificate

- Mafube English Medium School
PSLE

Professional Development Certifications And Training

- **Certificate Of Completion : mHealth Basics-Introduction to Mobile Technology for Health Course**
 - Credential : [🌐 NextGenU.org](https://www.nextgenu.org/) | Free Public Health & Medical Education Online
- **Oracle Certification :**
 - [🌐 Oracle Fusion Cloud Applications HCM Process Essentials Certified - Rel 1](#)
 - [🌐 Oracle Cloud Infrastructure 2025 Certified Foundations Associate](#)
- **Networking & System Administration Training**
- **Cloud Computing Fundamentals (Oracle Cloud – Training and Practical Exposure)**

Projects

- **Fraud Detection System over USSD Transactions (2023/24)**

Successfully submitted in partial fulfillment of a Bachelor of Science in Computer Science, Faculty of Science and Technology, National University of Lesotho.

- Developed a machine learning model to detect fraud in USSD transactions.
- Used Python, scikit-learn, PostgreSQL to analyze transaction patterns, & detect anomalies.
- Conducted data pre-processing, feature engineering, and model evaluation for accuracy and reliability.

- **School Admissions Management System (2025 – Present)**

- Links: <https://lems-site.web.app> || <https://lems-admin.web.app>

- Designed and developed a React cloud based admissions platform to manage student applications, document uploads, and administrative review workflows.
- Built responsive frontend applications and deployed them on Firebase Hosting.
- Implemented a Dockerized Node.js (Express) REST API deployed on Google Cloud Run, integrated with PostgreSQL for secure relational data management.
Optimized performance using Redis caching, Firebase Storage for document management, and Google Cloud Tasks for asynchronous processing.

- **More Projects :** <https://phookopm.github.io/portfolio-site/#projects>

Experience

- **IT Center Maseru** (Jan 2025 - Present)

System Support & Network Administrator (Full time) || IT Support & Network Security Instructor (Part time)

Key Duties and Responsibilities :

- Managed Oracle Cloud database instances including monitoring, backup, and performance optimization while implementing disaster recovery strategies to ensure data integrity and minimal downtime.
- Administered secure network and database access in compliance with organizational security standards.
- Maintained and supported IT infrastructure and client server systems for centralized data

management and real-time updates.

- Configured and tested network topologies, firewalls, access points, and endpoint devices.
- Delivered technical training in networking (TCP/IP, VLANs, routing, switching) and cybersecurity including penetration testing with Kali Linux, Metasploit, and network analysis using Wireshark.

- **Computer-Hub Leribe**

(Feb 2024 - Jan 2025)

IT Support and Consultant (Remote)

Key Duties and Responsibilities :

- Support and Consultancy: I assist clients with technical issues, providing support through various communication channels.
- Troubleshooting Hardware and Software Issues: Identify and resolve problems with computer hardware and software related issues, which may include diagnosing failures and repairing or replacing faulty components.
- Point of Sale (POS) Systems Installation and User Training

- **National University Of Lesotho**

(Sep 2023 - Feb 2024)

Computer Science Lab Assistant (Volunteering, On-site)

- Fundamentals to C++ programming year 2 module

Key Duties and Responsibilities :

- **Facilitating Lab Sessions:** Assist students during C++ programming lab sessions by providing guidance on coding exercises and debugging errors.
- **Supporting Practical Learning:** Help students understand core programming concepts such as variables, loops, functions, arrays, and object-oriented programming in C++.
- **Promoting Good Coding Practices:** Encourage students to follow clean coding standards, write efficient algorithms, and use proper documentation in their code.

Soft Skills

- Good communication skills (interpersonal and extra personal)
- Problem-solving
- Critical thinking
- Adaptability
- Time management
- Attention to detail
- Collaboration
- Teamwork
